

Title: LL4008 8-channel

Product number: LL4008

Brochure Number:

General:

Operation: The LL4008 unit combines 8 channels of 2Mbps G703 data in both directions, and transmits it over one pair of fibres. The LL4008 unit on the receiving end then converts the optical signal back to the 8 channels of data. The channels remain independent of each other and do not need to be synchronised.

OS4008 8 ch. 2Mbit E1 G703 optical fibre
